

BLACK HILLS SPRUCE

(PICEA CANADENSIS ALBERTINA)

The above photograph was taken last September 3rd. It is one of the most beautiful blocks of 5-year old TRANSPLANTS Black Hill Spruce in the country. They have been in the seedling bed 3 years and then grown in the transplant beds, shown above for an additional 2 years. Remember these are transplants and not just ordinary seedlings. Transplants develop a heavy bushy root system thus insuring their successful growth. TRANSPLANTS are sure to grow. Note the even uniform size and they average about 8 to 10 inches and some much more. The Black Hill Spruce is one of the hardiest of all Spruces. Symetrical, compact and bushy in habit of growth. Their color is always a fresh green. They are used for individual specimens, backgrounds, borders and shelter-belts. This is the finest stock we have offered to the trade since we have been in business. *Reserve your stock at once* and shipment will go forward in the early spring *prepaid* at the best planting time. Roots are packed in damp moss to insure safe delivery. Planting instructions will be included. Prices are as follows, cash with order. 100 trees \$23.10; 200 trees \$43.90; 500 trees \$106.50; (For North Dakota delivery please add 2% sales tax.)

HOW MANY TREES PER ACRE?

| <i>Planting distances</i> | <i>Trees per acre</i> |
|---|-----------------------|
| Rows, 6 feet apart, each way | 1,210 |
| Rows, 8 feet apart, each way | 680 |
| Rows, 10 feet apart, each way | 435 |
| Rows, 12 feet apart, each way | 300 |

COLORADO BLUE SPRUCE

(PICEA PUNGENS)

At the left is a photograph of Colorado Blue Spruce 5-year old transplants. Photographed last Sept. 3rd. They have been in the seedling bed 2 years and in the transplant bed shown here, 3 years. This is an unusual and excellent field of transplants and they run to a very strong percentage of shiners. Their average size is 8 to 10 inches and many of them larger. Here is your chance to get some husky well developed hardy trees. Few evergreens have obtained the popularity of the Colorado Blue Spruce, they are in much demand all over the country. Stock such as this is very much limited in supply and we are very proud of this top-quality material. *Reserve your stock at once.* Shipment will go forward in the early spring at the best planting time. Roots are packed in damp moss to insure safe delivery. Planting instructions will be included. Prepaid prices are as follows, cash with order. 100 trees \$36.60; 200 trees \$69.55; 500 trees \$170.20; (For North Dakota delivery please add 2% sales tax.)
